Concerning : “ Ashford “ , (v. Air Jordan alpha) , 5 ½ year brown gelding

Clinical examination :

External clinical examination and palpation are normal (stabilised splints left and right front medial).
Auscultation of heart and lungs are normal at rest , during work and recovery .
Ophthalmologic examination of both eyes is normal .
Mouth and teeth show no abnormalities .
There is no indication for impediments .
Dynamic examination on all three gaits on straight line and circle on hard and soft surface is normal .
Flexion tests of all four legs are negative .

Conclusion : the horse is clinically sound

Radiological examination :

- ° Navicular bone : normal
- ° Front feet : normal
- ° Front fetlock joints : normal
- ° Proximal sesamoid bones : normal
- ° Hock joints : normal
- ° Stifles : normal
- ° Hind fetlock joints : normal

Conclusion : horse is radiologically sound , favourable advice as a sporthorse

Dr. D. Parmentier
