

DECLARATION OF PRIOR KNOWLEDGE OF THIS HORSE'S CLINICAL HISTORY (See Note E)

To the best of my knowledge and belief:

- 1) The seller (or the selling agent) IS a client of my veterinary practice
- 2) The horse HAS NOT previously been attended by me or my veterinary practice.
- 3) The horse's veterinary history known to me DOES NOT increase the risk of purchase.

REPORT OF RELEVANT CLINICAL FINDINGS AND/OR HISTORY

Good clinical examination. Examination of eyes, heart, lungs, bars of mouth and incisor teeth were unremarkable. No signs of vices or stereotypes were shown during examination. Horse was sound and flexion tests were negative. Radiographic study reveals mild bone modeling tarsometatarsal joint left hock, small bone fragment palmar aspect right fore fetlock and a small bone fragment tarsocrural joint right hock.

INSURANCE	Where possible and if required, the prospective purchaser is advised to confirm that they are able to obtain suitable insurance cover before purchasing the horse.
SELLER'S WARRANTY	The prospective purchaser should consider obtaining a warranty from the seller with respect to vices, previous conditions or surgery and other significant information before purchasing the horse. (See note F)

OPINION OF THE EXAMINING VETERINARY SURGEON (See Note G)

In my opinion, on the balance of probabilities, the conditions reported above DO NOT prejudice this horse's suitability for purchase to be used for Show jumping .
