Horse Name: Crimpack's Carlot R

Chipnumber: 276097209080396

UELN:

Pedigree: Carell X Pilot

Date of birth: 2009.04.05.

Examination place and date: Kiskunfélegyháza, HUNGARY, 02.10.2021

Veterinary Certificate

The above mentioned horse was examined on 02.10.2021.

There were no signs of an internal or a cardiovascular disease.

The respiratory system in rest and after exercise was normal.

There were no findings in both eyes.

There were findings in the musculoskeletal system which could curtail the horse performance.

Both front limbs are swollen, effused fetlock joints and enlarged suspensory apparatus. Suspensory branches are painful on palpation.

In trot on straight line the horse shows lameness on left fore. On lunge on soft ground the horse shows weak canter and slightly lame R/H.

All flexion tests were slightly positive, R/H flexion test was increased positive.

There are 20 x-ray pictures which you will find enclose.

In my opinion the horse is not fit to compete by the date of examination.

Kecskemét, 2021.08.29.
