General

| | |
|--------------------|--|
| Eye left | No abnormality |
| Eye right | No abnormality |
| Heart | No abnormality before and after exercise |
| Respiratory system | No abnormality before and after exercise |

Radiographs

A basic set of 20 Xrays was taken 3/05/2018. Today 3 new views of the LF navicular were taken.

| | |
|----------------------|--|
| Left Front Foot: | Very small navicular fragment distal border |
| Right Front Foot: | Some smaller synovial invaginations distal border navicular bone |
| Left Front Fetlock: | Within normal limits |
| Right Front Fetlock: | Within normal limits |
| Left Hind Fetlock: | Plica synovialis fragment |
| Right Hind Fetlock: | Within normal limits |
| Left Hock: | Within normal limits |
| Right Hock: | Within normal limits |
| Left Stifle: | Within normal limits |
| Right Stifle: | Within normal limits |
| Back: | Within normal limits |

Comments

Radiographs acceptable. Radiographically this horse has a normal risk for the use of the horse as a sport horse. Because of no radiographic change in the LF navicular over 3 years the risk will be reasonable that the horse can be managed for the better part of a useful sports career.

Generally **positive** assessment

Dr Simon Buntinx, DVM
