**PREPURCHASE EXAMINATION "CAPAC"**

**PACIENT: Capac, Microcip-642019601030466 Sex-M, Age-10 ,Owner- Mihai Georgescu**

**VET CARRYING THE EXAMINATION:**

**1. General and clinical**

**examination:** Conformation and stands  
normal Nutritional status  
normal

Skin and coat  
Mucous membranes

**SENSITIVE ON PALPATION LEFT PASTERN**  
normal

Lymph nodes normal Eyes Right  
normal / Left normal Mouth  
normal

**2. Cardiovascular system**

Heart ray at rest normal Heart rate  
after exercise normal

**3. Respiratory System**

Spontaneous coughing 2 times during  
work  
Larynx sensitivity normal

Respiration at rest normal  
Type of respiration normal  
Laryngoscopy not done

**NOISY BREATH – MOST LIKELY LARINGEAL HEMIPLEGIA LOW GRADE**

**4. Digestive system**

External examination normal

**5. Urogenital system**

External examination normal

**6. Nervous system**

Tail tone normal  
Postural reflexes normal  
Coordination normal

**7. Inspection and Palpation**

Head normal Neck normal  
Withers normal  
Back normal  
Croup normal

Left Front Limb	normal
Right Front Limb	normal
Left Hind Limb	normal
Right Hind Limb	normal

#### 8. Fore hooves and hind hooves

Horn quality	normal
Hoof percussion	normal
Hoof inspection	normal
Size and shape	normal
Nonresponsive on hoof-testers both heels, both anterior hooves	

#### 9. Gait Walking on hard surface

Straight line	normal
Small circle left	normal
Small circle right	normal
Trotting on hard Surface Straight line normal	
Small circle left	
Small circle right	abnormal on right hindlimb
Trotting on soft Surface	
Small circle left	normal
Small circle right	normal

#### 10. Flexion tests

LF: forced flexion	not sensitive
Trotting away:	+/-
RF: forced flexion	not sensitive
Trotting away:	+/-
LH: forced flexion	not sensitive
Trotting away:	+/-
RH: forced flexion	not sensitive
Trotting away:	+/-

#### 11. Conclusions Clinical examination:

The clinical exam is satisfactory (not ideal).

**In the circle there is an embarrassment on the soft surface on the right hind limb.**

### Conclusions:

The horse can be the subject of pony tour and initiation tests.

\* A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse. The doctor conducting the examination is not responsible for hidden horse defects, which could not be revealed in the ordered formula and the purpose of the above examination.
