right : _____

Stifle AP 0° left : _____

right : _____

Back _____ projections : _____

Neck _____ projections : _____

wnv = within normal variations

Horse: Lady Luck WS

Other x-rays: _____

Recommendation/Statement: _____

The examination serves as a statement of the health condition of the horse at the time of the examination. The examination does not serve as a declaration of defects in the legal sense. Stereotypes like weaving or crib biting, housing dependent chronic bronchitis, allergies and particular diseases of the upper airway tract, that are only assessable after intensive exercise cannot be assessed. The examination does not include assessment of these disorders. The examination will also not give predictions about the conformation of the horse and how this will influence the breeding or sport career of the horse. The assessment of the obtained findings is done with the greatest possible care of the veterinarian and reflects his or her opinion. A prediction about the future development of the health status, performance and application cannot be determined, because it is a living animal that develops its constitution and condition constantly. A decision about the purchase or sale can only be taken by the customer.
