

## Radiographic examination report.

**Horse name:** Quilano RVL Z

**Passport number:** 056015Z55620412

### Clinical examination was not performed

**LF foot:** minor entesiohyte formation dorsal on pastern bone. Mineralisation of the ungular cartilage. Minor enlargement of the digital flexor tendon sheath.

**LF navicular bone:** irregular flexor surface with 5 enlarged vascular channels.

**RF navicular bone:** irregular flexor surface with 6 enlarged vascular channels.

**RF foot:** minor entesiohyte formation dorsal on pastern bone. Mineralisation of the ungular cartilage. Minor enlargement of the digital flexor tendon sheath.

**RF fetlock joint:** within normal limits.

**LF fetlock joint:** within normal limits.

**Back:** within normal limits.

**LH foot and fetlock joint:** within normal limits. Minor enlargement of the digital flexor tendon sheath.

**RH foot and fetlock joint:** small round osseous body disto-medial to plantar P1 eminence. Round subchondral bone cyst on a distal aspect of P2 with large cloaca.

**LH hock:** narrowing of the TMT and DITJ joint spaces. OCD fragment.

**RH hock:** narrowing of the TMT and DITJ joint spaces. Syndesmosis of the Metatarsal bones with advanced bone proliferation or advanced mineralisation in the proximal plantar metatarsal region.

Large entesiohyte formation on the proximal aspect of the Mt4 bone.

Radiopaque areas at the origin of the suspensory ligament.

**LH stifle:** within normal limits.

**RH stifle:** within normal limits.
