To whom it may concern,

I examined the above-named horse on the 7th July 2022

.....

The horse was born on the 5th July 2018, as per the passport. The horse's dentition is consistent with his passported age. The horse was examined in a straight line and on a circle on hard ground. Flexion tests and a ridden exam was also performed. Radiographic survey was performed as requested.

Good clinical examination. Examination of eyes, heart, lungs, bars of mouth and incisor teeth were unremarkable. No signs of vices or stereotypes were shown
