Evaluation & remarks: After clinical pre-purchase examination there is no  
concern to sell the horse.

The client is precisely informed about all medical findings. He/She knows that the whole examination, enlightments and veterinarian detected absence of defects are just applicable for the considered and executed examinations as well as the actual point of time. A safe prognostic statement is never possible!

- The client read our data protection notes and noticed them.
- The client confirms his sign agreeing to our data protection declaration.
