

CERTIFICATE OF VETERINARY EXAMINATION OF A HORSE FOR A PROSPECTIVE AUCTION

The notes A to G appear on the reverse of this certificate.

THE HORSE WAS PRESENTED BY:

On: 04.10.22

DESCRIPTION OF THE HORSE (See Note A)

NAME of horse (or breeding) Candido Z	
BREED or TYPE Zangersheide	
COLOUR Grey	
SEX Stallion	
AGE by documentation: (See Note B) 15.05.2016	
Dentition consistent with an APPROXIMATE AGE or AGE RANGE of: (See Note B) 6yo	
Head:	ID BY MICROCHIP
Neck:	
Limbs: LF:	
RF:	
LH:	
RH:	
Body:	
Acquired Marks:	
Freeze Marks/Brands:	
Passport Number(s):	056015Z55657416
Microchip Serial Number:	528210004407726 NONE FOUND/ NOT SEARCHED FOR

ADDITIONAL PROCEDURES (See Note D)

The following specialised diagnostic techniques were undertaken: **Radiographic exam dated 16.09.22**

Report appended on the findings of additional procedures **YES / NO**

Flexion tests were performed on the following limbs: **LEFT FORE / RIGHT FORE / LEFT HIND / RIGHT HIND** (delete those tests not performed)

Reasons for any flexion tests being omitted: (if applicable) **N/A**

Trotting on a small diameter circle on a firm surface **WAS / WAS NOT** performed.

Reasons for the above test being omitted: (if applicable) **N/A**

A blood sample **WAS / WAS NOT** taken from the horse during the examination.

A blood sample was not taken because: (if applicable) **Not required by Owner.**

REPORT OF RELEVANT CLINICAL FINDINGS AND/OR HISTORY

A basic clinical exam at rest and an assessment of the horse at trot on straight lines, circles and following flexion tests were performed. The following findings are reported as a result:

1. Mild toe-out conformation to front feet
2. No clinical abnormality
3. Sound on straight lines, circles and following flexion tests.

Report continued on attached sheet **YES / NO**

Veterinary Surgeon's Signature:

Date of Signature: 04.10.22

Veterinary Surgeon's Name: **Dr. Corrado Montoneri DVM, PhD, MBA, CertAVP, MRCVS**

Address: **Priory Veterinary Surgeons, 10 Evesham Road, Reigate, RH2 9DF**

ADDITIONAL NOTES

(A) IDENTIFICATION AND LEGAL OWNERSHIP

This certificate serves to identify the horse that was examined, but it is not the responsibility of the examining veterinary surgeon to ascertain that the declared seller has legal title in the horse. It is the responsibility of the purchaser to satisfy themselves as to the ownership of the horse and to verify the records of any microchip with the relevant database.

(B) AGE

Without appropriate paper records from foalhood it is not possible to confirm the age of a horse with accuracy. Estimates of age based on a dental examination are imprecise and unreliable and any age range shown on the certificate is approximate and based on opinion only. In the absence of documentary evidence, the term 'aged' may be used to refer to a horse considered after examination to be over 15 years of age.

(C) THE EXAMINATION

The opinion given is based purely upon those parts of the examination that were completed and described in the report.

(D) ADDITIONAL PROCEDURES

Any procedures carried out such as radiography, ultrasonography, and endoscopy are listed. The original records of these procedures (such as radiographs, ultrasonographs, photographs), as well as the blood sample taken for medication analysis, are and remain the property of the examining veterinary surgeon.

Unless specified in additional procedures, this examination does not include examination of the inside of the prepuce (sheath), a detailed mouth examination with a speculum, a height measurement or any examination for pregnancy.

Flexion tests and trotting in a circle on a firm surface are not mandatory parts of the standard procedure, but they can sometimes provide useful additional information about a horse. There may be circumstances when the examining veterinary surgeon concludes that it is unsafe or inappropriate to perform such tests.

(E) THE HORSE'S CLINICAL HISTORY

If the examining veterinary surgeon is aware of any prior veterinary involvement with the horse, the examination will only have been carried out with permission for disclosure of all of the known clinical history. If the clinical history represents a greater than normal risk of the horse developing future problems (i.e. recurrence or delayed consequences of a prior condition), this should be indicated on the certificate along with an explanatory note. A horse may have received veterinary treatment beyond the awareness of the examining veterinary surgeon.

(F) SELLER'S WARRANTY

The opinion provides no assurances in respect of matters that can only be established by a seller's representations to the purchaser. A seller's warranty is a matter between the seller and the purchaser and is not the responsibility of the examining veterinary surgeon. The purchaser should consider obtaining a written warranty from the seller covering, for example, matters such as medical or surgical history, height, freedom from vices, temperament, non-administration of drugs prior to the examination and the horse's previous or existing uses and performance levels.

(G) THE OPINION

The opinion expressed in this certificate is based solely on the standard procedure of examination described above. The opinion is subject to the limitations of the examination (see note C above) and provides no assurances in respect of those matters that can only be established by a seller's representations to a purchaser (see note F above).

The horse examined may, at the time of the examination, have been subject to some previously administered drug or medicament having the effect of masking or concealing some disease, injury or physical abnormality that might otherwise have been clinically discoverable.
