**Veterinary Certificate****Horse: Clarified****Date of Birth: 05-July-2017****Microchip No: 372141420273030****UELN No: 372414020273030****Colour: Chesnut****Sex: Gelding**

To whom it may concern,

The above mentioned horse was examined at |
Ireland on the 26th September 2022.

Examination:

Eyes, heart and integumentary were examined.

The limbs were palpated and flexed.

A brief neurological examination was performed involving turning in tight circles and backing up.

The horse was trotted on a hard level surface both in the straight line and in the circle.

After this, flexion tests on fore and hind limbs were performed.

'Clarified' was then lunged on the soft sand at the canter.

The horse was trotted again on the hard level surface after exercise.

Findings/Comments:

- Mild aural plaques are present in both ears of no consequence.
- Palpation of the limbs revealed no abnormalities other than a mild bony prominence on the outside of the right hind fetlock.

In my opinion, on the balance of probabilities, the conditions reported above DO NOT prejudice this horse's suitability for purchase to be used for sport horse activities.

If you have any questions regarding this report, please, do not hesitate to contact me.
