Endoscopy of the upper respiratory tract: (Sept. 29, 2021)

☐ not examined

☒ normal

☐ findings:

Evaluation of the examination

Following the prepurchase examination carried out today,

☒ no evidence could be found of health problems that could influence the state of health.

☐ significant findings found:

Shivering did not affect the horse in
the examination of the locomotory
system!

The client confirms that prepurchase examination includes the general conditions and that he/she has been adequately informed regarding the finding of this examination and risk that may be involved. The undersigned states that he/she has been authorized by the client to give all necessary declarations in connection with the prepurchase examination.
