

RONTGENVERSLAG PAARD

Algemeen

Datum onderzoek: 11-10-2022
Dierenarts: Drs. Linda De Weert
Toelichting: 22RX041
RX36

Signalement paard

Naam: Nightingale
Ras: KWPN
Geslacht: ruin
Geboortedatum: 27-04-2018
Chipnummer: 528210004847691

Röntgenonderzoek

Straalbeen(hoefkatrol):	LV: navicular bone grade 2	RV: navicular bone grade 2
Kootgewricht (arthrose):	LV: fetlock joint grade 1	RV: fetlock joint grade 1
Sesambeenderen:	LV: sesamoid bones grade 2	RV: sesamoid bones grade 2
Spronggewricht (spat):	LA: hock grade 1	RA: hock grade 1
Kniegewricht:	LA: stifle no remarks	RA: stifle no remarks
Toelichting:	Left front newbone formation dorsolateral side pastern bone, quiet process with smooth edges	

Fragmentatie

LA: fetlock LH small plantar fragment -> low risk	RA: fetlock RH small plantar fragment -> low risk
--	--

Röntgenonderzoek van andere onderdelen: Neck no significant remarks
Back grade III out of VII

Advies: Fragments fetlock RH and LH give low risk, if risk elimination is wanted arthroscopical removal of fragments is possible

Samenvatting: Some radiographical remarks but no major remarks that limits horse's functionality

Drs. Linda De Weert,
