20.12.2021

**X Ray Report O'Hara (056-002-W00307362)**

The horse was examined radiographically at the 26.04.2021.

18 pictures of the legs were done.

There were no findings that indicate a higher risk for actual sport use of the horse.

The following deviations from the norm were found:

Both front distal limb (lateral view): Flat angle of the coffin bone (Negativ palmar angle)

Both front feet (Oxspring view): Flat retraction coffin joint central (symmetric)

Left hind tarsus: light flattening of the talus.

Left hind fetlock: Chip plantar fetlock.

Stifle: normal

With best regards

Dr. Thomas Stöckl
